

A SUSTAINABILITY PROJECT BY HENRY LAMOTTE OILS AND THE SAVANNAH FRUITS COMPANY

# Shea Butter handcrafted

The production of Shea Butter has a long tradition in Africa: the women of the village communities collect and process the nuts by hand. Conventional roasting processes produce a lot of smoke, which is harmful to health and the environment.

Four innovative enclosed shea roasters and a tricycle for fast and safe transportation: This is the investment by Henry Lamotte Oils in cooperation with the Savannah Fruits Company for the Jakpahi cooperative in Ghana to support the women in their daily work. Thanks to the new roasters, they benefit from less smoke and save time in the manufacturing process. The new process saves 80 percent of CO<sub>2</sub> emissions and 90 percent of firewood.

## Contribute to the Sustainable Development Goals of the United Nations:

### SUSTAINABLE DEVELOPMENT GOALS

Better health and safety conditions for women

Less CO<sub>2</sub> emissions in the Shea Butter production process

Stop deforestation

## Qualities from the cooperative

QUALITIES	MASTER ITEM NUMBER
Shea Butter handcrafted, natural, filtered	86059
Shea Butter handcrafted, refined	86046

## Become part of the project

- With the purchase of each of our Shea Butter handcrafted qualities, ten cents per kilogram sold are invested in a sustainable project in the Jakpahi cooperative and beyond in the Shea Butter handcrafted supply chain.
- Purchase Shea Butter handcrafted on request directly from the cooperative and support the value creation in its origin. Please do not hesitate to contact us!
- Start an individual sustainability project in the cooperative together with us: With further investments, for example, the need for additional roasters, kneading machines, ovens, storage rooms, or toilets can be covered. We will be happy to check current requirements from the cooperative on your request.
